

gem5 Neoverse-V2 FDP

EVES + VTAGE, FEAT_SB; the bracket's real `sb` under both switch designs

Apple M4 — shipping silicon

load value predictor: 36 bits, measured; `msr DIT` serialises

- blanket DIT
- Apple's bracket (mrs DIT, msr #1, sb, call, restore) — flush-after switch (--apple)
- the same bracket under the renamed switch (--expedite, gem5 only)
